CEREBRO, YOUR VIRTUAL SYSTEMS ADMINISTRATOR

Set your infrastructure to
auto-pilot mode with confidence.

See the Real Meaning of Autonomy

Incident
Prioritization

Problem
Analysis

Automated
Resolution

Knowledge
Base

GET A VIRTUAL SYSTEMS
ADMINISTRATOR
POWERED BY ARTIFICIAL
INTELLIGENCE AND
MACHINE LEARNING.

Any System Log

Whatever operating system your computer or edge node is running on, Cerebro is able to collect the logs.

Any Application Log

Collect data from your applications. Cerebro learns how your software behaves and spots anomalies.

Multiple Data Sources, One Console

Cerebro loves data. Configure it for all your environments and see the magic happen from a single console.

Alerts & Notifications

Get notified by email or in your Slack channel whenever a new type of incident is detected.

Automation is the best solution to help infrastructure teams keep their service levels high, without burdening them. Nothing can stop your expansion.

EDGE PLATFORM AS A SERVICE & DECENTRALIZATION

Reap all the benefits of distributed computing with a single, unified, and intelligent platform.

Deliver Anything at the Edge of the Network

Deploy
to any
hardware

Orchestrate
thousands
of locations

Automate
service
provisioning

Charge
accurately
per usage

Enable your
services for
5G & mobility

FOR ANY USE CASE
REQUIRING
ACCELERATED,
REAL-TIME PROCESSING

Enhanced Mobile Broadband (eMBB):

- Augmented and virtual reality (AR/VR)
- 4K and 360° live video streaming
- Collaboration and education
- Digital signage

...

Ultra Reliable and Low Latency Communications (URLLC):

- Autonomous vehicles
- Drone delivery
- Telesurgery
- Smart grids

...

Massive Machine Type Communications (mMTC):

- Industrial IoT
- Smart homes and cities
- Remote monitoring
- Logistics tracking

...

INFRASTRUCTURE AS A SERVICE (IAAS)

For small to hyperscale-style infrastructure as a service, with bare metal, virtual machines, containers, and more.

**Unleash Your Infrastructure's Full Potential
with the Best Technologies on the Market**

Software-defined
network, compute
& storage

Docker
containers
& Kubernetes

Latest
open source
components

Built-in
automation
& orchestration

White label,
billing
& support

DEVELOP, TEST & DELIVER NEW SOLUTIONS FROM ONE PORTAL

API Management

Add as many features as you want by integrating popular solutions using RESTFul APIs.

App Center (Marketplace)

Install approved platforms such as Gitlab directly from the Marketplace.

Publisher Portal (My Apps)

Deliver and sell web, mobile and IoT applications right from the portal.

Database as a Service (DBaaS)

Deploy SQL and NoSQL databases offered "as a service". No need to install servers.

Ormuko IaaS is a fit for service providers and enterprises willing to solve challenges that cloud hyperscalers can't: latency, data privacy, high cost, and flexibility.
